

If the FCC accepts BellSouth's request to stop regulating broadband service, this will kill the ISPs. As a consumer and a Sonic.net customer of 5 years, I am strongly opposed to this move. I am so pleased to have the choice of going with a smaller ISP because of the outstanding service and great support. Companies which built the Internet itself should not be wiped away and replaced by the large telephone monopolies. Please do not take away this right ... let's keep choices available and keep competition healthy.
